Supplies Needed

1 yard soft fabric such as fleece, flannel, velvet
Matching thread
Matching bias tape
1 yard 1/4 inch elastic

1. Place the guitar on a piece of newspaper or butcher paper and trace around it. Add 1/2 inch for a seam allowance.

2. Cut a second piece the distance around the sides plus 1 inch at the top and bottom for the seam allowance. Sew the 2 side pieces together.

3. Matching the side center top and side center bottom to the back center top and back center bottom, pin around the back clipping the curved sections as needed.

4. Place the cover on the guitar and cut to fit around the neck as needed.

5. Use bias tape around the unfinished edge of the side piece to form a casing. Turn under, stitch, leaving a 1-1 1/2 inch opening. Using a safety pin, insert 1 yard of 1/4 inch elastic. Tighten to fit snugly. Sew elastic together and close the opening in the casing. Enjoy!
